

EduVision – Higher Education Performance Dashboard

Interactive Power BI Storyboard & Analytics System Prototype

Comprehensive analytics concept for evaluating higher education performance, global university rankings, research output impact, international student dynamics, and multi-country academic benchmark comparisons.

DASHBOARD MODULE 01

University Overview

Executive command center highlighting global ranking distributions, top 10 institutions, and reputation scores.

DASHBOARD MODULE 02

Research Analytics

Deep research intelligence analyzing citation impact, productivity indices, and collaborative node networks.

DASHBOARD MODULE 03

Student Analytics

Student demographic reach, internationalization percentages, faculty ratios, and regional diversity heatmaps.

DASHBOARD MODULE 04

Country Comparison

Global atlas view for multi-country benchmarking, peer group filters, and multi-metric comparative matrices.
